

# Natalin™

Tri-Layer Amniotic Membrane Allograft

**Strength • Handleability • Ease-of-Use**

## What is Natalin™?

- Decellularized inert amnion scaffold derived from the placenta of a healthy, full-term pregnancy
- It is devoid of cells, hormones, growth factors and cytokines

## Features Exclusive to Natalin:

- **Easy to handle:** three layer design is thicker than other single layer amnion
- **Easy to use:** no preparation required
- **Conforms easily:** to irregular surfaces
- **Tri-layer design:** allows for suturing if needed
- **10-year shelf life:** stored at ambient room temperature

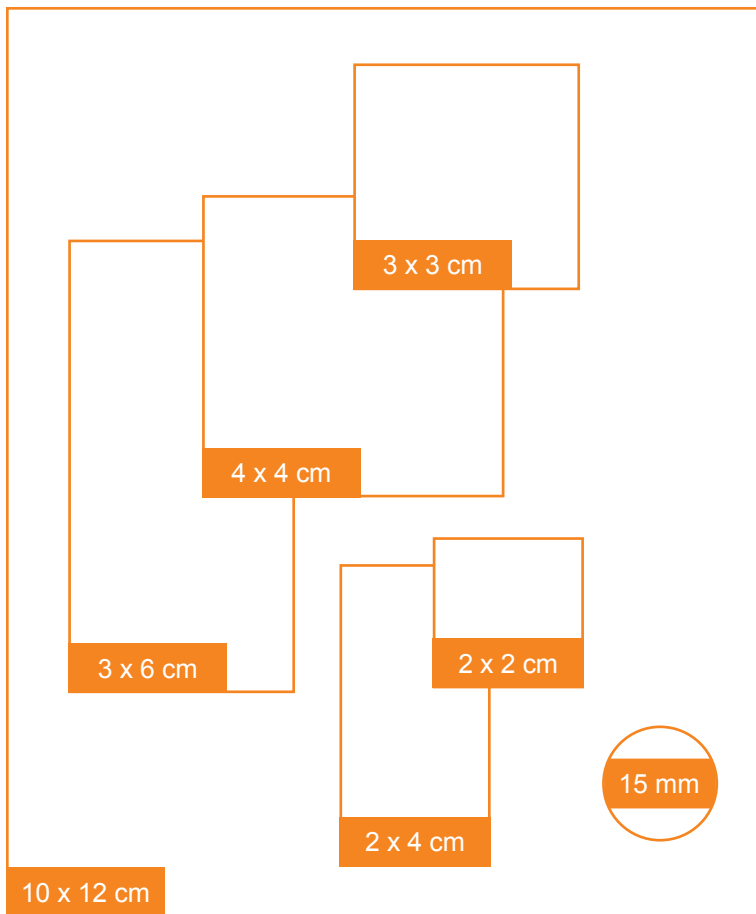

**Natalin's unique 3-layer construction** is designed for improved handleability and ease of use when used as a covering, barrier, or wrap for surgical applications and wound care.

- ✓ **3-dimensional design** provides more surface area and allows for suturing if necessary.
- ✓ **3 laminated layers** to improve structural integrity and handleability.

# Product Ordering Information

Available in seven sizes for application flexibility.

| Size       | Product Code: |
|------------|---------------|
| 15 mm      | DHAM015N      |
| 2 x 2 cm   | DHAM022N      |
| 2 x 4 cm   | DHAM024N      |
| 3 x 3 cm   | DHAM033N      |
| 4 x 4 cm   | DHAM044N      |
| 3 x 6 cm   | DHAM036N      |
| 10 x 12 cm | DHAM012N      |
